

Vine Trimmer Type E

Especially suitable for smaller tractors

The tilt cylinders on the Type E vine trimmer are fitted with lock valves as standard. The bolted cutting units with 3mm shell ensure the greatest stability.

The Type E vine trimmer also features individually adjustable side cutting units with separate collision protection devices. Hydraulic width offset is optionally available.

Vine Trimmer Type E

Standard equipment and extras

Collision protection at the rear, front and side. Aluminium clamping bar for easy re-tensioning of the fan belt and additional stabilization of the cutting unit.

Practical support trolley for easy attachment and detachment. No jacks or forklifts required.

Large blades and low rotational speed, as well as the 90mm fan belt pulley with cover, guarantee a significantly longer service life. No botrytis centrifuge and no turbo wear.

Easy to attach. No hoses on the bonnet.

A horizontal blade with fixed axle and separate oil motor ensures the greatest stability and longest service life. No guide rollers are necessary.

Technical Data

- Cutting length: Horizontal 1 blade (70cm) with separate oil motor; vertical 3 blades (148/160cm) or 4 blades (176 cm)
- Two control units are required. Upon request also available with joystick control and with hydraulic width offset.
- Operating pressure is approx. 50 bar at 10 litres/min
- High-grade steel
