

Pre-trimmer Type VS06

Fast, light and stable - A titan among the pre-trimmers

Thanks to its special hydraulic system, freilauber's pre-trimmer works extremely quickly and cleanly. Due to the rapid opening and closing times, only very few vines remain on the post.

Important facts at a glance

- Light yet stable construction: the materials used are able to absorb heavy forces
- Can be fitted to any mast (even those from third parties)
- The vertical distance between two cutting discs is easy to adjust, thereby enabling variable cutting performance
- Can be used directly after harvest
- The base frame with six discs can be expanded to up to 12 discs (cordon set)
- Weight from 90kg
- Changeover time when altering the cutting length is only about 8 minutes
- Optional: Automatic control for opening wood and steel posts
